

SUMMARY

Frontend-focused developer with hands-on experience building scalable web applications using React and modern JavaScript/Typescript ecosystems. Strong foundation in full-stack development with MERN Stack combined with a product-oriented mindset and focus on clean UI/UX and performance.

TECHNICAL STACK

Frontend: React, TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express.js, Python

Databases: MongoDB, MySQL, Oracle SQL, Supabase

Tools: Git, GitHub, REST APIs, JWT Auth, Ollama, Render

PROJECTS

Iterum – AI-powered Scrum Management Platform

GitHub

- Architected and shipped a full MERN stack platform across 5 Scrum sprints (56 user stories, 96% DoD compliance) with 5 role — based dashboards — Admin, Company, Product Owner, Scrum Master, Developer.
- Built a locally-deployed AI microservice (Python/FastAPI/Ollama/Mistral 7B) that auto-generates MoSCoW backlogs, user stories from spec documents, and a context-aware AI help assistant — fully decoupled, zero data sent to external APIs.
- Implemented real-time collaboration via Socket.IO (live Kanban, team chat).
- Integrated Cloudinary for media uploads, Resend for transactional emails, and an automated sprint scheduler for end-to-end sprint lifecycle management.

Solofact – Full-Stack Web Application

GitHub

- Developed a modern full-stack application with secure authentication and dynamic data handling.
- Focused on frontend performance, reusable components, and clean UI architecture.
- Applied best practices for scalable project structure and maintainability.

Business Management System

- Built a web platform to manage clients, services, and scheduling workflows.
- Designed REST APIs and implemented full CRUD functionality.
- Improved data organization and usability for business operations.

EXPERIENCE

Web Developer White Honey

Jun 2026 – Sep 2026

- Developed a web application for product, supplier, and stock management.
- Improved features and user interfaces based on business needs

PFE Intern (Final Year Project) – STRATYZE

Feb 2026 – Jun 2026

- Engineered **Iterum**, an AI-powered Scrum management platform at STRATYZE, delivering 5 role-based dashboards and a local AI service (FastAPI/Ollama) for automated backlog generation across 5 Agile sprints.

Advanced Internship – Gafsa Phosphate Company (CPG)

Jan 2025 - Feb 2025

- Full-stack web solutions with Node.js and MongoDB, delivering responsive interfaces and improving application usability and user experience.

Summer Internship – Institut Horizon

Jun 2025 - Aug 2025

- Delivered software solutions and handled system maintenance and troubleshooting.

Introductory Internship – Gafsa Phosphate Company (CPG)

Jan 2024 - Feb 2024

- Worked on IT infrastructure operations, covering LAN/MAN networks, hardware diagnostics, system maintenance, troubleshooting, surveillance equipment, and network communication technologies (RJ45 cabling, data transmission).

EDUCATION

Bachelor's Degree in Information Technology - Mention Excellent
Higher Institute of Technological Studies (ISET), Gafsa - 2026

ADDITIONAL

Languages: Arabic (Native), French (Professional), English (Working)

Interests: UI/UX Design, Frontend Engineering, AI , Automation
